Investigation of radiation-caused cancer among Ground Zero workers

Radiation had contaminated the World Trade Center Towers - 9/11 Sicknesses consistent with environmental radiation contamination

The Canadian National Newspaper Exopolitics Headlines by David Jones 7 Jan 2010

A group of 9/11 responders has contracted blood cancers at an unusually young age, and top doctors suspect the disease was triggered by an unprecedented “synergistic mix” of toxins at the World Trade Center site. These growth of these cancers among Ground Zero workers, and others, are consistent with exposure to environmental radiation contamination associated with the destruction of the “9/11 targets”.

The WTC Medical Monitoring Program is now studying a group of Ground Zero workers, including cops, construction workers and volunteers, suffering from cancers such as leukemia, lymphoma and multiple myeloma.

“The kind of thing that worries us is that we have a handful of cases of multiple myeloma in very young individuals... a condition that almost always presents late in life,” said Dr. Robin Herbert, co-director of the program at Mount Sinai Hospital.

“That’s the kind of odd, unusual and troubling finding...<http://exopoliticsnews.wordpress.com/2010/01/07/radiation-had-contaminated-the-world-trade-center-towers/>
